

Microblading Pre & Post Care

Fifty percent of the outcome of your brows is dependent upon proper before and after care. In order for your new brows to heal properly, these Microblading Pre & Post Care Instructions found below are of the UTMOST IMPORTANCE.

MICROBLADING PRE-CARE

Do not work out 24 hours before procedure. No alcohol or caffeine 24 hours before procedure. Avoid sun and tanning one week prior to procedure. Do not take Aspirin, Niacin, Vitamin E or Advil/Ibuprofen 24 hours before procedure. No brow waxing, tinting, microdermabrasion or chemical peels one week before. Discontinue Retin-A 4 Weeks Prior. Do not use AHA skincare products close to the eyebrow area 2 weeks prior to and 2 weeks after your procedure. No Botox around the brow area 2 weeks prior.

Please Note: You will be more sensitive during your menstrual cycle.

MICROBLADING POST-CARE

Keep the brow area clean by using a natural fragrance-free gel cleanser (such as Cetaphil) and water. Hands must be freshly clean. Avoid use of abrasive washcloths or sponges. Allow eyebrows to completely air dry before applying ointment. Apply the after care ointment given (for the amount of days recommended by your artist) with freshly washed hands or a Q-Tip. DO NOT rub, pick or scratch the treated area. Let any scabbing or dry skin naturally exfoliate off. Picking can cause scarring and pigment loss! COMPLETELY avoid direct sun exposure and tanning beds for a minimum of 4 weeks after your procedure. Direct sunlight can cause the pigment to change color while it is healing and can also cause hyper pigmentation and scarring. Avoid pool, sauna, steam rooms, hot showers and/or hot baths for 3 weeks. Avoid sweating for a full 10 days. Any physical effort, gym, hot weather, any other activity that may cause sweating through or on the brows will expel pigment from the dermis producing poor results. Avoid sleeping on your face/brows for the first 10 days. Keep your bangs and hair pulled back from your face for the first 10 days. NO makeup or skincare products to be used on the treated area for two weeks. NO facials, chemical treatments and microdermabrasion for 4 weeks. NO botox for 4 weeks. We recommend that it's best to wait until after your touch up heals to get Botox, as an educated injector will take your new brows into consideration when choosing where to inject. After 10 days, once the area has healed completely, consider using sunblock when going out in the sun to stop the color from fading. Eyebrow tinting should not be undertaken for 2 weeks after your procedure. Avoid Retin-A, Chemical Peels and Microderms around the brow area once healed.

Please note: Eyebrows will appear darker and bolder due to natural healing for the first two weeks. This is very common for all permanent cosmetic procedures.

PERMANENT MAKEUP IS NOT RECOMMENDED FOR ANY CLIENTS WHO ARE OR HAVE:

Pregnant or Nursing

Diabetic

Viral infections and/or diseases

Epilepsy

A Pacemaker or major heart problems

Had an Organ transplant

Tendency towards keloids

Seborrheic dermatitis

Skin irritations or Psoriasis near the treated area (rashes, sunburn, acne, etc.)

Sick (cold, flu, etc.)

Had Botox in the past 2 months

Have upcoming vacations or special occasions planned.

Used Accutane in the past year Allergic to anesthetic (Lidocaine)Extremely Oily or Problematic Skin

ATTENTION PLEASE:

I strongly advise prospective new clients to book their Microblading appointments at least 3-4 months in advance of Vacations, Weddings, and Special Occasions. This allows adequate time for healing of both your Initial Microblading Appointment as well as a Touch-Up Enhancement Session 6-8 Weeks prior. To have perfect brows it is a multi step process. Dream brows cannot be achieved in just one session. Some clients need more than two sessions to achieve their desire density and shape
